

GRI Standards Certified Training Course

The GRI is a globally recognized sustainability reporting framework, which has been refined over the years to match the needs of different stakeholders in the society to report on how an organization's activities affect the economy, the environment and the society. The framework has evolved from GRI G4 to the GRI Standards, which are the only recognized version starting from 2018. The course equips students in preparing top quality sustainability reports through *understanding principles of sustainability reporting* and applying them with *case studies*.

Learning Outcomes:

- Global sustainability policies
- The value and history of sustainability reporting
- Structure of the GRI Standards
- Comparing GRI to other sustainability standards – HKEx ESG and SDG
- 10 Reporting Principles
- Steps to prepare a sustainability report
- Reporting for strategies, ethics and governance
- Stakeholder Engagement
- Materiality and Topic Boundary
- Management Approach
- Core and Comprehensive, in accordance with options
- Compiling information – framework to set targets
- Formats to present the report
- Tools GRI provides to facilitate reporting

Target Audience:

- Listed company who needs to comply with HKEx ESG Reporting Guide
- Those who prepares sustainability reports
- Those who want to upgrade your knowledge on sustainability and reporting
